

# grandMA2 remote

All important functions of the grandMA2 including changes to the patching and the chat window can be controlled by grandMA2 remote.

This powerful remote control can also be used in connection with a grandMA2 on PC. As an integrated part of the MA system grandMA2 remote can display intensities and positions or attributes of any fixture in real-time. All members of the grandMA2 family support the use of grandMA2 remote. It can be connected with every single console or a grandMA2 station in a multi-user system using the standard WLAN environment.

grandMA2 remote runs on customary PDAs as well as on iPod® touch and iPhone®.

The MA remote control package comprising Apple iPod® touch and Lancom Access Point is optionally available.
